What is the Rights Issue?

This is an offer of approximately 114,016,235 New Shares to our Eligible Shareholders who are registered on the Record Date. The New Shares are being offered on the basis of one New Share for every three Shares then held.

The net proceeds from the Rights Issue will be used for working capital purposes and to fund exploration and development, including:

- Detailed exploration activities on the Narndee Tenements near Mt Magnet in Western Australia following an extensive review of all recent and historic exploration data collated and used to identify high priority exploration targets for follow-up drill testing.
- Ongoing review and preliminary evaluation of possible acquisitions or Joint Ventures. Maximus has been undertaking reviews of potential Joint Venture or project acquisition opportunities of projects that represent an early transition to production. A specific requirement of the reviews is that any project must be shovel-ready or very close to production approval.
- Working capital.

Opening and Closing Dates

The Rights Issue will open for receipt of acceptances on the Opening Date and closes on the Closing Date. Our directors reserve the right to close the Rights Issue early or extend the Closing Date. You should lodge your Entitlement and Acceptance Form as soon as possible.

Can you transfer your right to New Shares?

The rights to New Shares are non-renounceable, which means that rights may not be traded.

What are the rights attached to New Shares?

New Shares will be issued on the same terms as our Shares that are already on issue. Full details of the rights attached to Shares are set out in our constitution. You can inspect a copy of our constitution at our registered office.

A summary of the rights attached to Shares follows.

- Voting rights

Subject to any rights or restrictions attached to any class of Shares, at a meeting of our members: on a show of hands each member has one vote; and on a poll each member has one vote for each fully paid Share they hold, and a fraction of a vote for each partly paid Share they hold.

- Dividends

Subject to the terms on which Shares are on issue, the directors may pay dividends as they see fit.

- Future issues of Shares

Subject to the Corporations Act 2001 (Cth), the Listing Rules and our constitution, the Company may issue Shares and grant options over unissued Shares, under the control of our directors. We may issue preference shares on terms approved by special resolution. We may reduce our share capital, buy-back Shares and convert Shares into a larger or smaller number.

- Share transfers

Subject to our constitution and the Listing Rules, a shareholder may transfer a Share by an instrument of transfer in any common form or other form approved by the directors.

- Variation of rights

The rights and privileges attaching to Shares can be altered by special resolution of the shareholders. A special resolution is a resolution passed by at least 75% of the votes cast by members entitled to vote on the resolution.

- Rights on Winding Up

If on a winding up there are enough assets to repay all capital to shareholders, all capital must be repaid to the shareholders and any surplus must be distributed among the shareholders in proportion to the amounts paid on their respective shares before the winding up began.

Subject to any special rights or restrictions attached to Shares, on a winding up, the liquidator may, with the sanction of a special resolution of shareholders, distribute among the shareholders the whole or any part of our property (in its actual state) and decide how to distribute the property as between the shareholders or different classes of shareholders.

Is there a minimum capital raising?

There is no minimum limit to the amount of capital to be raised under this Rights Issue.

Part 4 – Summary of Risks

Like all investments, the market price of our Shares may fall as well as rise.

Our potential returns are subject to risks specific to us and to general risks.

You should consider all risks before you make a decision about this Rights Issue. It is impossible to identify all risks, but we draw your attention to the following.

General Market Conditions

The price of the Shares on ASX may rise or fall due to numerous factors including:

- general economic conditions, including inflation rates and interest rates;
- variations in the local and global markets for listed shares in general, or for mining stocks in particular;
- changes to government policy, legislation or regulation;
- competition in the industry in which the Company operates; and
- general operational and business risks.

There can also be no guarantee that an active market in our Shares will develop or that the price of the Shares will increase. There may be relatively few, or many potential buyers or sellers of the Shares on ASX at any given time. This may increase the volatility of the market price of the Shares, and the prevailing market price at which shareholders are able to sell their Shares.

The matters set out above may result in you receiving a price for your Shares that is more or less than the price under this offer.

The demand for and price of commodities is influenced by a variety of factors including the level of forward selling by producers, costs of production, general economic conditions, the level of inflation, interest rates and exchange rates.

Future Capital Requirements

We may require additional capital to fund further exploration/development of our existing or new projects. Our ability to raise sufficient further capital within an acceptable time frame and on terms acceptable to it will vary according to a number of factors including (without limitation) the prospects of new projects (if any), the results of exploration and subsequent feasibility studies, stock market and industry conditions and the price of relevant commodities.

Exploration and Development

Exploration by its nature contains elements of significant risk. Ultimate success depends on the discovery of economically recoverable resources, obtaining the necessary titles and governmental regulatory approvals and obtaining and servicing of funding for mining operations if and when a decision to mine is made.

There can be no assurance that our existing projects or any other projects or tenements that we may acquire in the future will result in the discovery of significant resources. Even if significant resources are identified, there can be no guarantee that they will be able to be economically exploited.

Our current and future operations, including exploration, appraisal and possible production activities may be affected by a range of factors, including:

- geological conditions;
- limitations on activities due to seasonal or unseasonal weather patterns;
- alterations to joint venture programmes and budgets;
- the availability of drilling rigs and other machinery necessary for the Company to undertake its activities;
- unanticipated operational and technical difficulties encountered in survey, drilling and production activities;
- mechanical failure of operating plant and equipment, industrial and environmental accidents, industrial disputes and other force majeure events;
- unexpected shortages or increases in the costs of consumables, spare parts, plant and equipment; and
- prevention or restriction of access by reason of political unrest, outbreak of hostilities, and inability to obtain consents or approvals (including clearance of work programs pursuant to existing, and any future access agreements entered into with indigenous people).

Loss of Key Personnel

Our success depends on the competencies of our directors and senior management. The loss of one or more of our directors or senior management could have a materially adverse effect on our business, financial position and results of operations. The resulting impact from such an event would depend on the quality of any replacement.

Native Title & Aboriginal Heritage

Some of our tenements are located within areas that are the subject of claims or applications for native title determination. The Native Title Act 1993 (Cth) and related State native title legislation and aboriginal heritage legislation may affect our ability to obtain access to certain of its exploration areas or to obtain mining production titles. Settling any such claims will incur costs to us. The degree to which this may impact on our activities will depend on a number of factors, including the status of particular tenements and their locations. At this stage, we are not able to quantify the impact, if any, of such matters on its operations.

Title, Environmental Bonds & Conditions

All mining tenements which we may acquire either by application, sale and purchase or farm-in are regulated by applicable state mining legislation. There is no guarantee that applications will be granted as applied for. Various conditions may also be imposed as a condition of grant. In particular, we have interests in tenements in the Adelaide Hills region

of South Australia, covering areas situated close to private residences. Although we have taken every reasonable step to apply for all relevant authorisations at the earliest opportunity, the proximity of the areas covered by the tenements to private residences increases the risk of delay.

Environment

Our projects are subject to State and Federal laws and regulations regarding environmental matters. Many of our activities and operations cannot be carried out without prior approval from and compliance with all relevant authorities. Resource activities can be environmentally sensitive and can give rise to substantial costs for environmental rehabilitation, damage control and losses. We intend to conduct its activities in an environmentally responsible manner and in accordance with all applicable laws.

Resource Estimates

Resource estimates are expressions of judgement based on knowledge, experience and industry practice. Estimates which were valid when made, may change significantly when new information becomes available. In addition, resource estimates are imprecise and depend to some extent on interpretations, which may prove to be inaccurate. Should we encounter mineralisation or formations different from those predicted by past sampling and drilling, resource estimates may have to be adjusted and mining plans altered in a way which could impact adversely on our operations.

Agreements with Third Parties

We are and will be subject to various contracts and agreements with third parties. There is a risk of financial failure or default by a counterparty to these arrangements. Any breach or failure may lead to penalties or termination of the relevant contract. In addition, our interest in the relevant subject matter may be jeopardised.
