

ASX Announcement

26th April 2012

**Drilling Commenced on Maximus' Narndee
poly-metallic project in WA**

Summary

- **Drill program commenced on Tuesday 24th April 2012**
- **9 hole program targeting high priority co-incident Airborne EM and ground gravity highs**

Maximus Resources Limited, (ASX: MXR) is pleased to report that drilling has commenced on its highly prospective Narndee project in the Western Australian Murchison region.

This initial Reverse Circulation (RC) exploration drilling program commenced on Tuesday 24th April on tenement E59/908 and is scheduled to be completed in early May 2012.

The initial hole, ND18_01 is due for completion this morning (26th April), with progress expected to accelerate now that site establishment is complete and all drill sites are fully prepared.

The approved Works Program (Figure 1) is targeting the areas where co-incident Airborne EM and ground gravity highs were recorded during the company's recent successful initial exploration activities and aims to test the locations for massive sulphide accumulations.

The Company continues to pursue significant massive sulphide structures with similar geology to the Golden Grove poly metallic mine located 120km west of the tenement.

Samples for assaying shall be prepared onsite and routinely dispatched to Mt Magnet for transport to the Assay laboratory in Perth for analysis. Results are anticipated within 5- 6 weeks of receipt in Perth.
