

3rd April 2013

Dear Shareholder

Non-Renounceable Rights Issue

On 18 March 2013, Maximus Resources Limited (**MXR**) announced a one-for-two non-renounceable rights issue (**Rights Issue**).

The Rights Issue seeks to raise approximately \$1.55 million (before costs) through the issue of approximately 386 million new fully paid ordinary shares (see enclosed Prospectus) to be used to fund exploration and development, including:

- Follow-up drilling on the Narndee Copper-Gold-Zinc tenements to further improve upon encouraging results returned in the initial drilling programs;
- On-ground reconnaissance and soil sampling programs on Narndee high priority targets to more accurately pin-point target areas for follow-up exploration;
- Commence exploration activities on the highly prospective northern Narndee gold tenements;
- Review of data to be generated as part of a SA government funded regional gravity survey over parts of the highly prospective Gawler Craton region located within the Woomera Prohibited Area (WPA) and could significantly change the Prospectivity of the Billa Kalina tenements; and
- Working capital purposes.

The Company has achieved significant progress on several projects in the past 18 months and accomplished several milestones.

The comprehensive review of the Narndee suite of tenements, identification of 18 high priority targets, completion of two very successful drill campaigns identifying very good copper-gold-zinc targets and commenced planning for drilling on highly prospective gold targets on the northern tenement holding.

In addition, the Company completed a review of the Adelaide Hills tenement package in South Australia, achieved drilling success on its gold targets and continues to negotiate Joint Venture opportunities with several parties in relation to the Bird in Hand project.

Access onto the Billa Kalina tenements, within the Woomera Prohibited Area (WPA) in the highly prospective Gawler Craton region in South Australia, was negotiated with the Department of Defence to facilitate exploration on several targets. The tenement ownership structure was also rationalised, with Maximus now controlling 100% of these tenements. Discussions have commenced with several companies interested in undertaking exploration of the Billa Kalina tenements.

The Company has also progressively rationalised the tenement ownership structure, to ensure Maximus controls activities on the extensive tenement holding. Maximus now holds 100% of all mineral rights on all tenements, with the exception of diamond rights to several Adelaide Hills tenements in SA.

The Rights Issue will be partially underwritten by the directors as detailed in the prospectus dated 18th March 2013 confirming their ongoing belief in the tenements and their Prospectivity.

Applications for new ordinary shares under the Rights Issue may only be made by completing the Entitlement and Acceptance Form which accompanies the Prospectus. Eligible Shareholders should read the prospectus carefully. For further information on the Rights Issue, you should contact your professional advisor.

Yours faithfully

PART 4 – SUMMARY OF RISKS

Like all investments, the market price of our Shares may fall as well as rise.

Our potential returns are subject to risks specific to us and to general risks.

You should consider all risks before you make a decision about this Rights Issue. It is impossible to identify all risks, but we draw your attention to the following.

General Market Conditions

The price of the Shares on ASX may rise or fall due to numerous factors including:

- general economic conditions, including inflation rates and interest rates;
- variations in the local and global markets for listed shares in general, or for mining stocks in particular;
- changes to government policy, legislation or regulation;
- competition in the industry in which the Company operates; and
- general operational and business risks.

There can also be no guarantee that an active market in our Shares will develop or that the price of the Shares will increase. There may be relatively few, or many potential buyers or sellers of the Shares on ASX at any given time. This may increase the volatility of the market price of the Shares, and the prevailing market price at which shareholders are able to sell their Shares.

The matters set out above may result in you receiving a price for your Shares that is more or less than the price under this offer.

The demand for and price of commodities is influenced by a variety of factors including the level of forward selling by producers, costs of production, general economic conditions, the level of inflation, interest rates and exchange rates.

Future Capital Requirements

We may require additional capital to fund further exploration/development of our existing or new projects. Our ability to raise sufficient further capital within an acceptable time and on terms acceptable to the Company will vary according to a number of factors including (without limitation) the prospects of new projects (if any), the results of exploration and subsequent feasibility studies, stock market and industry conditions and the price of relevant commodities.

Exploration and Development

Exploration by its nature contains elements of significant risk. Ultimate success depends on the discovery of economically recoverable resources, obtaining the necessary titles and governmental regulatory approvals and obtaining and servicing of funding for mining operations if and when a decision to mine is made.

There can be no assurance that our existing projects or any other projects or tenements that we may acquire in the future will result in the discovery of significant resources. Even if significant resources are identified, there can be no guarantee that they will be able to be economically exploited.

Our current and future operations, including exploration, appraisal and possible production activities may be affected by a range of factors, including (without limitation):

- geological conditions;
- limitations on activities due to seasonal weather patterns;
- alterations to joint venture programmes and budgets;
- the availability of drilling rigs and other machinery necessary for the Company to undertake its activities;
- unanticipated operational and technical difficulties encountered in survey, drilling and production activities;
- mechanical failure of operating plant and equipment, adverse weather conditions, industrial and environmental accidents, industrial disputes and other force majeure events;
- unexpected shortages or increases in the costs of consumables, spare parts, plant and equipment; and
- prevention or restriction of access by reason of political unrest, outbreak of hostilities, and inability to obtain consents or approvals (including clearance of work programs pursuant to existing, and any future access agreements entered into with Indigenous parties).

Loss of Key Personnel

Our success depends on the competencies of our directors and senior management. The loss of one or more of our directors or senior management could have a materially adverse effect on our business, financial position and results of operations. The resulting impact from such an event would depend on the quality of any replacement.

Native Title & Aboriginal Heritage

Some of our tenements are located within areas that are the subject of claims or applications for native title determination. The *Native Title Act 1993* (Cth) and related State native title legislation and aboriginal heritage legislation may affect our ability to obtain access to certain of our exploration areas or to obtain mining production titles. Settling any such claims will incur costs to us. The degree to which this may impact on our activities will depend on a number of factors, including the status of particular tenements and their locations. At this stage, we are not able to quantify the impact, if any, of such matters on operations.

Title, Environmental Bonds & Conditions

All mining tenements which we may acquire either by application, sale and purchase or farm-in are regulated by applicable state mining legislation. There is no guarantee that applications will be granted as applied for. Various conditions may also be imposed as a condition of grant. In particular, we have interests in tenements in the Adelaide Hills region of South Australia, covering areas situated close to private residences. Although we have taken every reasonable step to apply for all relevant authorisations at the earliest opportunity, the proximity of the areas covered by the tenements to private residences increases the risk of delay.

Environment

Our projects are subject to State and Federal laws and regulations regarding environmental matters. Many of our activities and operations cannot be carried out without prior approval from and compliance with all relevant authorities. Resource activities can be environmentally sensitive and can give rise to substantial costs for environmental rehabilitation, damage control and losses. We intend to conduct activities in an environmentally responsible manner and in accordance with all applicable laws.

Resource Estimates

Resource estimates are expressions of judgement based on knowledge, experience and industry practice. Estimates which were valid when made, may change significantly when new information becomes available. In addition, resource estimates are imprecise and depend to some extent on interpretations, which may prove to be inaccurate. Should we encounter mineralisation or formations different from those predicted by past sampling and drilling, resource estimates may have to be adjusted and mining plans altered in a way which could impact adversely on our operations.

Agreements with Third Parties

We are and will be subject to various contracts and agreements with third parties. There is a risk of financial failure or default by a counterparty to these arrangements. Any breach or failure may lead to penalties or termination of the relevant contract. In addition, our interest in the relevant subject matter may be jeopardised.

be changed to the extent necessary to comply with the applicable ASX Listing Rules at the time of restructure or reorganisation. Any changes to the terms of the options will not result in any benefit being conferred to the Optionholders which is not conferred on the shareholders of the Company.
